CONTENTS OF VOL. 70 Nos 1–6

NUMBER 1—JULY

Superplastic deformation mechanism accommodated by the liquid phase in metal matrix composites
By M. MABUCHI and K. HIGASHI 1

Microstructure and cavitation in the superplastic Zn–22 wt% Al alloy: effect of solution heat treatment
By KYUNG-TAE PARK, J. C. EARTHMAN and F. A. MOHAMED 7

Roughening transition in *n*-paraffin crystals and the coupled Ising–solid-on-solid model
By XIANG-YANG LIU, H. J. F. KNOPS, P. BENNEMA, P. VAN HOOF and J. FABER 15

Investigation of intrinsic point defects in rapidly quenched copper by nuclear quadrupole double resonance
By K. KONZELMANN, G. MAJER, M. NOTTER and A. SEEGER 23

The temperature dependence of the antiphase boundary energy of a relaxed fault in an Fe_3Al alloy
By D. G. MORRIS and M. LEBOEUF 29

A study of dislocations in $Al_{62}Cu_{20}Co_{15}Si_3$ decagonal quasicrystals by means of high-resolution electron microscopy
By H. ZHANG, Z. ZHANG and K. URBAN 41

The origins of growth spirals on laser-ablated $YBa_2Cu_3O_{7-\delta}$ thin films
By M. AINDOW and M. YEADON 47

Some new crystalline approximants of Al–Pd–Mn quasicrystals
By H. L. LI and K. H. KUO 55

Erratum 63

NUMBER 2—AUGUST

Strain and domain evolution in $YBa_2Cu_3O_z$
By M. GOLDMAN, C. P. BURMESTER, L. T. WILLE and R. GRONSKY 65

The irreversibility of dislocation-wall formation in persistent slip bands
By U. HOLZWARTH and U. EßMANN 75

Harper–Dorn creep in single crystals of lead, rutile and ice
By J. N. WANG 81

Dynamical recovery of InSb⟨123⟩ between 340 and 510°C
By K. AHLBORN, H. G. BRION and H. SIETHOFF 87

Defects in irradiated metallic (Au and Ag) and semiconducting (Si) targets simulated by molecular dynamics
By A. M. MAZZONE 93

NUMBER 3—SEPTEMBER

The structure of decagonal Al–Cu–Co–Si: an electron channelling study
By W. NÜCHTER and W. SIGLE 103

Analytical transmission electron microscopy analysis of Ag and Mg segregation to {111} θ precipitate plates in an Al–Cu–Mg–Ag alloy
By J. M. HOWE 111

Relaxation of antiphase boundary tubes in Ni_3Al
By A. H. W. NGAN 121

Direct as against indirect dispersion work hardening
By P. M. HAZZLEDINE and N. P. LOUAT 129

Guinier–Preston zones in a high-purity Al–Zn–Mg alloy
By A. K. MUKHOPADHYAY 135

Friedel oscillations in the two-dimensional electron gas in the low-density regime
By A. GOLD 141

Detection of ionic mobility in $YBa_2Cu_3O_{7-\delta}$ by means of the phase-sensitive rejection-filtering technique
By T. KUSHIDA and Y. W. KIM 149

The structure of Al_3Pd: close relationship to decagonal quasicrystals
By Y. MATSUO and K. HIRAGA 155

The structure of an Al–Pd decagonal quasicrystal studied by high-resolution electron microscopy
By K. HIRAGA, E. ABE and Y. MATSUO 163

Highly ordered structure of icosahedral quasicrystals in Zn–Mg–RE (RE = rare earth metals) systems
By A. P. TSAI, A. NIIKURA, A. INOUE, T. MASUMOTO, Y. NISHIDA, K. TSUDA and M. TANAKA 169

Erratum 177

NUMBER 4—OCTOBER

The instability of Paidar–Pope–Vitek locks in $L1_2$ compounds
By G. SCHOECK 179

Atomic-scale investigation of grain-boundary microchemistry in the nickel-based superalloy Astroloy with a three-dimensional atom probe
By L. LETELLIER, M. GUTTMANN and D. BLAVETTE 189

The compositionally modulated faceting of grain boundaries in the $Bi_2Sr_2Ca_{n-1}Cu_nO_x$ system
By Y. YAN, J. E. EVETTS, B. SOYLU and W. M. STOBBS 195

A new phase in the intermetallic Au–Cu system
By XIAOQING PAN, W. SIGLE, F. PHILLIPP and A. SEEGER 203

Effects of oxygen on the deformation behaviour in single-phase γ-TiAl alloys
By B. K. KAD and H. L. FRASER 211

A structural model of the orthorhombic Al_3Co derived from the monoclinic $Al_{13}Co_4$ by high-resolution electron microscopy
By X. Z. LI, X. L. MA and K. H. KUO 221

On the Mott derivation of crack velocity
By A. RABINOVITCH 231

First observation of amorphization in single-crystal $MgAl_2O_4$ spinel
By N. YU, K. E. SICKAFUS and M. NASTASI 235

The retention of krypton in polycrystalline silicon during high-temperature annealing
By M. J. W. GREUTER, L. NIESEN, A. VAN VEEN and J. H. EVANS 241

Free electrons and defects in microcrystalline silicon studied by electron spin resonance
By F. FINGER, C. MALTEN, P. HAPKE, R. CARIUS, R. FLÜCKIGER and H. WAGNER 247

Atomic mean-square displacements in f.c.c. metals
By R. C. SHUKLA 255

NUMBER 5—NOVEMBER

On a reaction involving Al–Cu–Ru icosahedral phase and Al_7Cu_2Ru
By B. GRUSHKO, U. LEMMERZ and C. FREIBURG 261

Radiation-enhanced diffusion in Cu_3Au: effects of long-range order
By Y. S. LEE, R. S. AVERBACK and C. P. FLYNN 269

Length distribution of secondary cracks in brittle materials
By A. RABINOVITCH, G. BELIZOVSKY and D. BAHAT 277

Transmission electron microscopy observation of a dislocation loop in an $Al_{70}Co_{15}Ni_{15}$ decagonal quasicrystal
By Y. YAN, Q. L. WANG, R. WANG, Z. ZHANG and M. KLÉMAN 281

Estimation of density of charged defects in amorphous chalcogenides from a.c. conductivity: random-walk approach for bipolarons based on correlated barrier hopping
By A. GANJOO and K. SHIMAKAWA 287

Fermion current–current interactions and orthogonality in two dimensions
By J. M. WHEATLEY 293

On the weight function for the wedge (or notch)
By X. MARKENSCOFF 297

A transmission electron microscopy study on crystalline surface domains on Al–Co decagonal quasicrystals and the τ^2-$Al_{13}Co_4$ approximant
By Z. ZHANG, L. N. MA, X. Z. LIAO and J. VAN LANDUYT 303

Non-equilibrium and equilibrium Al–Pd–Mn decagonal quasicrystals and their related crystals: structural characteristics and relationships revealed by high-resolution electron microscopy
By W. SUN and K. HIRAGA 311

Manganese-induced ordering in the α-(Al–Mn–Fe–Si) approximant phase
By P. DONNADIEU, G. LAPASSET and T. H. SANDERS 319

Room-temperature electrochemical synthesis of sequentially layered superconducting Bi–Sr–Ca–Cu–O films
By S. H. PAWAR, S. B. KULKARNI and M. J. UBALE 327

Trap-free space-charge-limited current: analytical solution for an arbitrary mobility law
By R. H. YOUNG 331

A critical discussion of the analytical approach to the normal grain growth of materials in a *D*-dimensional space with some possible extensions to other growth phenomena
By A. GADOMSKI 335

The structure of monodisperse foam
By D. WEAIRE and R. PHELAN 345

Construction of candidate minimal-area space-filling partitions
By J. A. GLAZIER and D. WEAIRE 351

NUMBER 6—DECEMBER

Stabilization of the amorphous phase inside carbon nanotubes: solidification in a constrained geometry
By R. PRASAD and S. LELE 357

60° misfit dislocation arrays at a GaSb–GaAs(001) interface
By J. M. KANG and A. ROCHER 363

Formation of bulk metallic glasses in neodymium-based alloys
By Y. HE, C. E. PRICE, S. J. POON and G. J. SHIFLET 371

Quasicrystal versus twinned approximant: a quantitative analysis with decagonal $Al_{70}Co_{15}Ni_{15}$
By M. A. ESTERMANN, T. HAIBACH and W. STEURER 379

Corrosion of diamond-like-carbon-coated nickel in 0·25 M sodium chloride
By D. P. BUTT, K. C. WALTER, M. NASTASI, A. L. CAMPUZANO, P. S. MARTIN, B. P. WOOD, D. J. REJ and G. G. MILLER 385

Sol–gel coating of ceramic powders
By R. GUINEBRETIÈRE, O. MASSON, P. RUIN, G. TROLLIARD and A. DAUGER 389

Subject index 397

Index of authors (with titles) 401
